Dear Sir or Madam:

This is a request for a Certificate of Correction for PTO mistake under 37 C.F.R. 1.322(a). The errors in the patent are obvious typographical errors or omissions and the correct wording can be found in the Amendment dated December 7, 2009, at Page 3, line 18. Attached is form PTO 1050 along with copies of documentation that unequivocally supports patentee's assertion(s).

Respectfully submitted,

MARSH FISCHMANN & BREYFOGLE LLP

Facsimile: 720-562-5519

Date: 7/17/10

5. (Original) The method of claim 1, wherein the customer identification information includes one or more of name, address, phone number, e-mail address, social security number, date of birth, or account number.

6. (Currently Amended) In a bill presentment and payment environment with a scheduled time to communicate billing information with a requesting Internet bill presentment and payment (IBPP) system, a method for providing billing information comprising:

receiving, by a server object of a biller server having a request handler connected to the server object and an implementation object which receives requests from the request handler, and from a client object of a requesting IBPP system, a request for information associated with a customer, wherein the request is verified and validated by the server object;

retrieving the requested information; and

forwarding the retrieved information to the requesting IBPP system at an unscheduled time.

7. (Original) The method of claim 6, wherein the step of forwarding the retrieved information comprises the steps of:

transforming the retrieved information to a format accepted by the requesting IBPP system; and

forwarding the transformed information to the requesting IBPP system.

8. (Currently Amended) A system for permitting real-time access by a customer to billing information in an Internet bill presentment and payment environment, the system comprising: a consolidator module; and a biller module, connected to the consolidator module, wherein the biller module includes biller-independent submodules for communicating with the consolidator module; biller-dependent modules for retrieving information from data stored by the biller; and an interface enabling the biller-independent submodules to interact with the biller-dependent submodules, wherein the biller module includes: a server object, which receives a request from the consolidator module; a request handler, connected to the server object, and an implementation object which receives the request from the request handler.
